1. "A KPV" v. "A KPV tripeptide"

It was advised that the term "a KPV tripeptide" be used in the claims.

2. "Treating" v. "inhibiting"

It was advised that the claims be directed to a method of "inhibiting" infection rather than "treating" infection.

3. The pathogen genus

It was advised that the pathogen genus, other than the species of *Staphylococcus* and the species of *Candida*, could be included in the claims were there support in the specification for the mechanism of KPV in inhibiting infection. It was advised that a §1.132 affidavit of the inventor regarding the mechanism of KPV in inhibiting infection be submitted. It was further advised that the support in the specification and the §1.132 affidavit may overcome the written requirement rejection.

Respectfully submitted,
